INTRODUCING A WHOLE NEW PHILOSOPHY OF SOLID STATE FREQUENCY CONVERTER DESIGN

PLUG & PLAY
UNIQUE VOLTAGE QUALITY

Aircraft are getting bigger, but as exciting as these new giants are, we all know that “bigger” also means “more power.” That’s why our R&D team has created the Hobart PoWerMaster® 2400. With its future-proof 400% overload capacity, Plug & Play voltage calibration and exceptionally clean power, the 2400 represents a whole new philosophy of customer-centric ground power equipment design. And we can’t wait for you to see it.

**Discover the Hobart PoWerMaster® 2400
at www.ITWGSE.com.**

Headquarters: 11001 US Hwy. 41 North Palmetto, FL 34221 U.S.A.

Your Guide To A \$347.5 Billion Market

Expansion, upgrades of existing airports, and technological advancements are all expected to increase the demand for the GSE market.

By Steve Smith

Steve Smith

We recently posted a report that pegged the global GSE market at \$347.5 billion this year and which also forecast the market to grow to almost \$457 billion in another five years.

Different designs and airframes made of composites could force ground service providers into alternative processes and equipment while improvements in aircraft design and related aviation equipment could improve efficiency and, therefore, reduce the cost of doing business, the report concluded.

If you're planning on adding to your inventory – big or small, new or used, parts and pieces – keep this print issue nearby. By my last count, there are 324 manufacturers and service providers listed in the following pages that will be glad to help you make your next GSE purchases. We've included addresses, phone and fax numbers, websites and emails to help you

make the right connections. Plus, we've provided an index with 23 product categories, from "Air Starts & Accessories to "GPUs, PCAs, Power Carts & Accessories" and from "Military" to "Vehicle Lifts & Maintenance."

You'll also find more buying information online with our Buyer's Guide at www.aviationpros.com. Plus, we'll soon turn this issue into our next edition of our new digital magazine, "Ground Service Provider"

(((WIRELESS)))

CLEAR COMMUNICATION FOR MORE EFFICIENT RAMP OPERATIONS WITH DAVID CLARK WIRELESS SYSTEMS

David Clark Company Wireless Headset Communication Systems provide clear communication and greater mobility for more efficient and time-saving pushback operations, deicing and a variety of other ground support applications. Rugged components include wireless gateways, controllers and noise-attenuating headsets that allow crew members to communicate up to 300 feet from the wireless gateway or controller, without being tethered to the aircraft or equipment.

1 EXPERIENCED TEAM

**80 COUNTRIES. 6 CONTINENTS.
60 YEARS.**

➤ **GARSITE: A GLOBAL LEADER IN AVIATION
REFUELING EQUIPMENT**

Major airlines, airports, FBOs and armed services from around the world rely on Garsite every day. We have been a recognized leader in aviation refueling equipment for more than 60 years and produced more than 15,000 units. Garsite is now proud to be part of Wabash National Corporation, a growing \$1.6 billion company. By leveraging corporate resources, R&D capabilities, and technology, we're taking Garsite and our products to new levels of performance. Take flight with Garsite — we will be fueling innovation for decades to come.

The Advance Metalworking Co., Inc. manufactures the Wing Jack Elevating Platform Trailer. This 4000-pound payload capacity trailer is specifically designed to carry aircraft wing jacks only. For heavier loads, the unique Lift-a-Load Elevating Platform Trailer is the ideal choice. Lift-a-Load trailers are available in eight different models, both single and dual axle with capacities ranging from 4,400 pounds to 15,000 pounds. The Lo Riser Inclining Platform Trailer can be hydraulically lowered to ground height. The built-in ramp provides a minimum angle, either 4 or 5 degrees depending upon model, to allow easy, drive-on access.

EXCEPTIONAL

SERVICE FROM THE GROUND UP.

Professionals that get the job done right.

From conducting routine maintenance to responding immediately to a mechanical emergency, when time and reliability are critical, you can count on ASIG to deliver. Our Technical Service department is made up of a team of highly skilled and trained specialists. Because programs and procedures are only as effective as the people providing the actual services, ASIG emphasizes hiring the most qualified electricians, mechanics, HVAC and technical specialists. Proprietary asset management software and national bulk purchasing programs for parts and supplies allow us to provide timely, efficient and reliable service while maximizing our customers' budgets. Our programs cover routine and preventive maintenance for fleet vehicles, GSE equipment, baggage handling systems, jet bridges and other airport facility equipment such as escalators, moving sidewalks, terminal doors and more.

For professionals that get the job done right,
call or visit us online today.

Denmark
Phone: 45-63-18-60-00
Fax: 45-63-18-60-49
Website: www.itwgse.com
Email: axapower@itwgse.com

AXA Power is the leading manufacturer of 400Hz solid-state Ground Power Units and Pre-Conditioned Air Units.

The AXA2400 series of ground power units is among the market's most advanced and reliable GPUs - ready to supply all types of aircraft including the A380 and the B787. The unit features 400% overload as a standard. It is also equipped with plug & play voltage compensation which provides an optimal voltage quality at the aircraft plug right where it is needed.

The AXA Power PCA is the only modular PCA on the market, and the first with step-less regulation. This means you get the exact flow of cool air you want - not more not less.

Replacing the aircraft APU by an AXA 400 Hz power supply and a pre-conditioned air unit, you can save both money and reduce your CO2 emissions.

As both a ground power and PC Air provider, FCX Systems has a diversified product line to support the needs of our Commercial and Military customers, and has provided units for the most demanding applications, including 270 VDC power and PC Air units for the F22 and F35 aircraft.

**MODEL MT65P21
 "EXPRESS HEAT" DEICER**

The "Premier" Model MT65P21 "Express Heat" Deicer utilizes the Versalift Extended Reach Model VST6000 Aerial lift, providing 65' of working height. More important, the MT65P21 incorporates the Premier boom forward design to provide the maximum amount of reach off the front of the vehicle utilizing the rapid deploy down riggers. During mobile operations, side reach of 34' and vertical reach of 46' can easily be accomplished.

Premier
 ENGINEERING & MANUFACTURING, INC.
Simple, Dependable and Affordable

"Express Heat" reliability, easy access maintenance, extend reach capabilities, and lowest cost of operation is why we are the "Premier" deicer manufacturer.

Since 1911 - over 100 years, Gleason Reel Corporation has been in the business of CABLE & HOSE MANAGEMENT. Our products are designed to convey and protect valuable cables and hoses that power and control moving machines of all types. They improve productivity and safety on the job by moving cables and hoses away from hazardous locations on machinery or the shop floor into a controlled environment. Whether you choose Reels for efficient storage and payout from virtually any angle,

Festoon or Conductor Bar Systems for overhead applications or PowerTrak for protection on machinery in motion, your cables/hoses will last longer and provide better service with a cable management system from GLEASON REEL CORPORATION.

Hammonds Technical Services is an equipment innovator with capabilities that start with an idea, move to full 3-D drawings and models, and end up a fully built and useful piece of equipment. From the fluid powered additive injectors to a electronic VISION data acquisition and controls package, additive injection systems are the "bread and butter" of the company. Hammonds Additive Injectors fit any place needed within the scope of your fueling applica-

tion. Hammonds Fuel Additives offers the world's standard and flagship additive, "BIOBOR JF." The fuel microbiocide is used in aviation, marine, and any hydrocarbon-based fuel. Since 1965, Biobor JF has been the leading biocide used world-wide to clean and rid fuel of slime, sludge and microbial contamination in fuel and fuel tanks.

Since becoming the first manufacturer of Aircraft Ground Power equipment in the domestic United States in 1946, Hobart has continually developed new products to meet the ever-changing requirements of the Aerospace industry. The Hobart product line includes 400 Hz and 28.5 VDC ground power units that are designed to provide AC or DC power with the latest in Engine Drive and Solid State technology. Hobart generators are designed and built at our factory and are the most reliable and recognized in the industry. Our ISO 9001 Certified Manufacturer status, along with UL and CE Certification assures our customers of the highest quality product. ITW GSE Hobart provides power units suitable for aircraft platforms in the commercial, general, business and military markets. ITW GSE Hobart, now part of ITW GSE, are divisions of Illinois Tool Works or ITW (NYSE: ITW), a diverse Fortune 200 company that employs nearly 51,000 people and is based in Glenview, Illinois, USA, with operations in 56 countries.

With more than 50 years in the aviation industry, Liquid Controls (LC) has built a name as a respected worldwide supplier of quality flowmeters and electronics for the aviation industry. Recently, Liquid Controls unveiled FlightConnect, an automated, easy-to-use data capture and management system that streamlines into-plane fueling operations. FlightConnect collects the details of each fueling and delivers them, wirelessly, to the doorstep of your back office software. LC is a business unit of the IDEX Corporation and part of the Liquid Controls Group.

Velcon manufactures filtration and separations technologies for use in aviation fuel, diesel fuel, electric utilities and military. In 1953, Velcon was established in response to the aviation fuel market's growing need for clean aviation fuel. Since then, Velcon has continued being a recognized leader—ensuring clean dry fuel for the aviation industry. Headquartered out of Colorado Springs, Colorado, Velcon has manufacturing facilities throughout North America and Europe. Our network of global distributors help us provide excellent support and service to our customers all around the world.
